Profile

I am a dedicated Software Engineer with extensive knowledge in Python and Django backed with strong Devops skills. I look forward to applying my technical knowledge across different fields. my experience in building highly scalable APIs and with a strong passion for automating infrastructure, streamlining workflows, and optimizing software delivery processes. With a solid foundation in cloud technologies and extensive hands-on experience with a variety of DevOps tools and practices, I have honed my skills through personal projects and open-source contributions. My GitHub account, donfortune, showcases my expertise in building scalable and resilient systems, implementing CI/CD pipelines, and leveraging cloud platforms for efficient deployment and monitoring. I thrive in fast-paced environments where collaboration and continuous learning are valued, and I am eager to contribute my skills to drive innovation and improve efficiency in any organization.
